(c) Subtract an amount equal to the total value of the plus location differentials computed pursuant to §1033.74(a);

(d) Add an amount equal to not less than one-half the unobligated balance in the producer-settlement fund;

(e) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to §1033.60(g).

(f) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the ''Weighted Average Differential Price''.

[58 FR 43508, Aug. 17, 1993]

§ 1033.62 Computation of producer protein price.

For each month the market administrator shall compute the producer protein price to be paid to all producers for the pounds of protein in their milk, as follows:

(a) Combine into one total the values computed pursuant to §1033.60, paragraphs (h) and (i), excluding the values associated with bulk fluid milk products received from a pool plant operated by a cooperative association pursuant to §1033.43(d), for all handlers who made reports pursuant to §1033.30 and who made payments pursuant to §1033.71 for the preceding month;

(b) Add all of the negative adjustments and subtract all of the positive adjustments determined for each producer's somatic cell count pursuant to §1033.66;

(c) Divide the resulting amount by the total pounds of protein in producer milk; and

(d) Round to the nearest whole cent. The result is the ''Producer protein price.''

[58 FR 43508, Aug. 17, 1993]

§ 1033.63 Uniform price.

A uniform price for producer milk containing 3.5 percent butterfat shall be computed by adding the weighted average differential price determined pursuant to §1033.61 to the basic formula price for the month.

[58 FR 43508, Aug. 17, 1993]

§ 1033.64 Announcement of weighted average differential price, producer protein price, and uniform price.

The market administrator shall announce publicly on or before the 12th day after the end of the month the weighted average differential price computed pursuant to §1033.61, the producer protein price computed pursuant to §1033.62, and the uniform price computed pursuant to §1033.63(a).

[58 FR 43508, Aug. 17, 1993]

§ 1033.65 Value of producer milk.

The value of producer milk shall be the sum of:

(a) The weighted average differential price computed pursuant to §1033.61 and adjusted pursuant to §1033.74, multiplied by the total hundredweight of producer milk received from the producer;

(b) The producer protein price computed pursuant to §1033.62 and adjusted pursuant to §1033.66, multiplied by the total milk protein contained in the producer milk received from the producer; and

(c) The butterfat price computed pursuant to §1033.50(d) multiplied by the total butterfat contained in the producer milk received from the producer.

[58 FR 43508, Aug. 17, 1993]

§ 1033.66 Computation of somatic cell adjustment.

(a) For each producer, an adjustment to the producer protein price for the somatic cell count of the producer's milk shall be determined by multiplying the constant associated with the appropriate somatic cell count interval in the table in paragraph (b) of this section by the average price for the month of 40-pound blocks of cheese at the National Cheese Exchange at Green Bay, WI, as reported monthly by the Dairy Division, Agricultural Marketing Service. If a handler has not determined a monthly average somatic cell count, it will be determined by the market administrator.
